

# Requirements Document

Carson H. Fujita

November 2025

## Overview

This document outlines the requirements and knowledge needed to produce a resume and portfolio website for employee viewing.

## Content

[Technical Skills Factsheet](#) Program and Skill Related Sheets

[Resume](#) Resume Requirements

[Portfolio](#) Portfolio Requirements

## Factsheet

According to a program fact sheet (provided by Humber Polytechnic), there is a variety of skills learned from Computer Programming and Analysis program at Humber Polytechnic. These skills include:

- Database Administration, design and programming
  - ERD
  - Normalizing Database
  - Oracle
  - PostgreSQL
  - SQLite
- Data analytics, quality assurance
- Java object-oriented applications
  - Javafx
- Android mobile programming
  - React-Native
- Front-end web development, PHP web development
  - React
  - EJS
- Scripting in UnixLinux
  - Bash
- Python applications, C#.NET applications, XML
  - Django
- System Analysis and Design (In progress)
  - UML diagrams

Skills I have picked up from highschool education from Mayfield Secondary School not already included:

- Java Swing
- UML class diagrams
- Arduino
- Basic Binary

Skills from passion projects:

- LaTeX

- NVIM
- Figma
- Tmux
- Bootstrap
- Fedora Operating System
- Ubuntu Operating System

Consider Including:

- Math passions
  - Linear Algebra
  - Trigonometry

### 0.0.1 Computer Programming and Analysis

Applicant's program is [Computer Programming and Analysis](#), the website describes the content as,

in addition to learning programming skills in a variety of languages, from Java and ASP.NET to PHP, JavaScript, Python and mobile programming (Android and iOS), the courses are designed to give students a solid foundation in theory and practice in web development and design, Oracle database management and administration, project management, technical writing, and all facets of information systems. (Humber Polytechnic, [2025](#), para. 2)

## 0.1 Resume

Construct a professional resume targeted to specific position and outline structure and format of professional resume. The Co-op Readiness Session provided by Humber Polytechnic requires that this part be completed by December 1st, 2025.

### Required Content

The basic structure of the resume should include the following important sections:

**Contact Information** Information for employers to contact with

**Objective** The goal of this resume

**Summary of Skills** The skills the applicant has

**Education** The education the applicant has

**Work Experience** The prior and current work duties of the applicant

**Optional** Optional information on volunteer experiences, awards, etc

**References** Optional message of references

#### 0.1.1 Contact Information

The Contact Information section of the resume must start at the very top with the applicant name and last name; this allows employers to reach out. It's important to note that Humber does not recommend pictures, mention of age, marital status, children, or religion in this section. Additionally, be wary about placing private information online.

The contact information section should begin in the following order:

- First Name
- Last Name  
Name must be larger font size than contact information
- City and Province
- Telephone  
Ensure voicemail is professional
- Professional email
- LinkedIn and GitHub link

Ensure the Github link is from the applicant's [portfolio](#).

## Section Requirements

Needs to follow the standards outlined above by including the complete information section. Do not have inconsistencies in font, and a causal email.

### 0.1.2 Employment Objective

This section declares the immediate intention of the candidate. Humber recommends that applicants keep it simple as this project is a co-op position. It has a short, targeted statement that is aligned to realistic goals and steady motivation; also, it is important to outline that they are a co-op applicant.

Co-op work in-take term take place this year after 4th Semester, as a Fall intake this applicant work term is summer-fall 2026.

## Examples

Examples include:

- (a) Co-op position in *TERM YEAR* related to *PROGRAM NAME*
- (b) *PROGRAM NAME* student pursuing a co-op work term where I can apply my strengths
- (c) Seeking a *TERM YEAR* work experience in the field of *PROGRAM NAME*

## Section Requirements

This section needs to be to-the-point with high clarity. Needs to describe the type of work, what the applicant has to offer with no excess. The availability term must be included.

### 0.1.3 Summary of Skills

One of the most important sections as it appears after the Objective and outlines the most Relevant skills. Important to focus on the hard skills as employers will scan this section first.

1. List top 3-5 technical skills that most relate to your [Objective](#). (see [Program Fact Sheet](#))
2. Highlight accomplishments or achievements
3. list top general employability skills or qualities related to [Objective](#)

It requires a heading. Avoid tables as they are not captured by Applicant Tracking Systems (ATS).

### **Order of Skills**

1. Technical skills.
2. Accomplishments.
3. Top general employability skills.
4. Certifications or licenses.
5. List of computer skills, eg. Word, Excel.

### **Section Requirements**

Includes technical skills and knowledge from the applicant's program, followed by a brief list of their general employability skills. List must be a maximum 5-6 bullets; if more than 6 bullets, break list into sections. Ensure that technical and softskills are separated.

#### **0.1.4 Education**

It is important to list any academic achievements i.e Honour Roll, Dean's List, awards or Scholarships. It may not be needed to note Highschool.

### **Section Requirements**

Applicant's program at Humber is first. Entry follows the structure and format of Humber's examples with accurate program name (see [Program Factsheet](#)); Years of study or Date of Graduation is apparent.

#### **0.1.5 Work Experience**

Typically list work experience, Humber recommends to list all work and volunteer work. Keep important softskills in descending order starting with the most recent and important. Be aware of past and present tense.

### **Section Requirements**

Position titles, organization, location and dates included per the sample provided. Bullets begin with strong action verbs, are in correct tense, and listed in order of importance; Bold face title/company name; Accomplishments are included; Jobs listed in *reverse chronological order*.

#### **0.1.6 Optional**

It's optional but avoid political or religious affiliations. Includes Volunteer Experience, Hobbies, Awards, achievements, etc. This can include a list of programming projects.

### **0.1.7 References**

You do not need to include a reference "References Available Upon Request". If, you wish to include it then just use that phrase. It's suggested to have a list ready.

## **0.2 Overall requirements**

Ensure that hyperlinks are correct, and the font is legible and no less than 10px. Each Heading starts with Capital Letters, is in bold, and is a larger font size than the following text. Use of fonts, bold etc are consistent; Dates and margins are aligned; 1 -2 pages maximum in length; Free of spelling and grammar errors.

## 0.3 Portfolio

A computer programmer's portfolio that acts as a collection of projects that showcase skills and experience, acting as a visual resume for potential employers. It needs to include a professional bio, contact information, a list of technical skills, and links to code on platforms like [Github](#).

### Required Content

**Contact Information:** Include email, phone-number, professional social media links.

**Bio/About Me:** Brief introduction.

**Skills:** List of technical skills.

**Projects:** Showcase of best projects.

- Have Variety.
- Make it Relevant.
- Make code accessible.

**Resume:** include downloadable resume.

**Testimonials:** consider including recommendations from employees, co-workers, or professors.

## Github Profile README

There is github [README](#) for profiles.

## **LinkedIn README**

Work in progress; Requirements not yet specified.
